

How to place your stock on the top

Uploading your stock daily does not improve your position in the search.

In BS the searches results are prioritized according to the position of each company in the ranking (in other words, the "Q¹" value). Your Q will be improved:

1. **Sending Quotations and accepting Order in the web.** The more you answer in the website, the more points you will earn; and the faster you answer the more points you will earn.
2. **Sending your Bearing Orders in the web.** The higher the purchase order amount is you will get a higher score. If your also fulfill the satisfaction questionnaire, you will earn more points.
3. **Being chosen as Favorite** by other companies. If other companies identify that your company is active and work well on the web, you will be chosen as favorite for your stock to be placed on the top on their searches and this will earn you points.

What can I do if my Q is low?

1. Each month you will have **free credits** to be used for placing your stock on the top of the searches at any time you choose.

These credits are not cumulated. At the end of the month, if you have not used, you lose them.

2. Another way to use these credits is to do offers of concrete references. These references will appear for 30 days on the top of the search results.

The offer of each reference costs only 1 credit. And remember: **At the end of the month, if you have not used the credit, you lose them.**
